HIGH-SPEED FIBER INTERNET FOR ALL PENNSYLVANIANS

CWA believes every Pennsylvanian deserves access to **fast, reliable, and affordable internet**—whether you're in a city, small town, or rural community.

From working remotely and virtual doctor visits to smart homes and streaming, we rely on strong internet connections. **Fiber optic cables are the gold standard in speed, reliability, and affordability—and our union members have been building and maintaining these networks for over 40 years.**

BUT NOW THAT PROGRESS IS AT RISK

The **Broadband Equity, Access, and Deployment (BEAD)** program is poised to bring fiber to underserved areas across Pennsylvania using federal infrastructure funds.

But the **new federal administration wants to shift priorities—favoring satellite internet over fiber.**

That might help satellite corporations, but it **HURTS YOU**—the families, small businesses, and communities that need **true high-speed internet.**

TAKE ACTION TO PROTECT PENNSYLVANIA'S FIBER FUTURE

TELL TELL THE NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION:

- Keep BEAD focused on **fiber-optic infrastructure**
- Don't let satellite interests derail affordable, future proof, fast internet access
- Support **union-built, high-quality broadband**
